

Ted Eldred was often asked if he knew how many Porpoise units were produced, but he could not recall and was not prepared to guess. The only clue we have is this advertisement (below) published in "Australian Skindiving" magazine in November 1965

*
Complete unit
£72.18.0.

Here's why 11,170 Australian divers, including the Armed Services use this amazing...

PORPOISE UNIVERSAL

The Porpoise Universal is the only regulator with a reducing valve that has "hand operated depth compensated air reserve. The balanced reducer ensures constant air line pressure, irrespective of tank pressure.

And, Porpoise gives you exclusive vacuum assisted breathing that makes diving a real pleasure.

Professionals like Diver Johnson regard the Porpoise Universal as the highest performing single hose regulation in the world.

Take a tip from the experts — enjoy the freedom and safety of a Porpoise Universal!

£34.10.0.

Complete unit
£72.18.0.

PORPOISE BAC-PAC
Made from strong corrosion-resistant aluminium and covered with black nylon coating for long life.
Heavy duty, blue webbing harness comprises two broad shoulder straps and waist belt with quick release buckle.
£8.10.0.

Effortless breathing at low cost!

PORPOISE SPORTSMAN

You get maximum air flow with the minimum breathing effort. The Porpoise Sportsman is simplicity itself — yet the mechanism tough enough to ensure trouble-free diving in the most turbulent of Australia's coastal waters.

Extras include famous vacuum assisted breathing!
